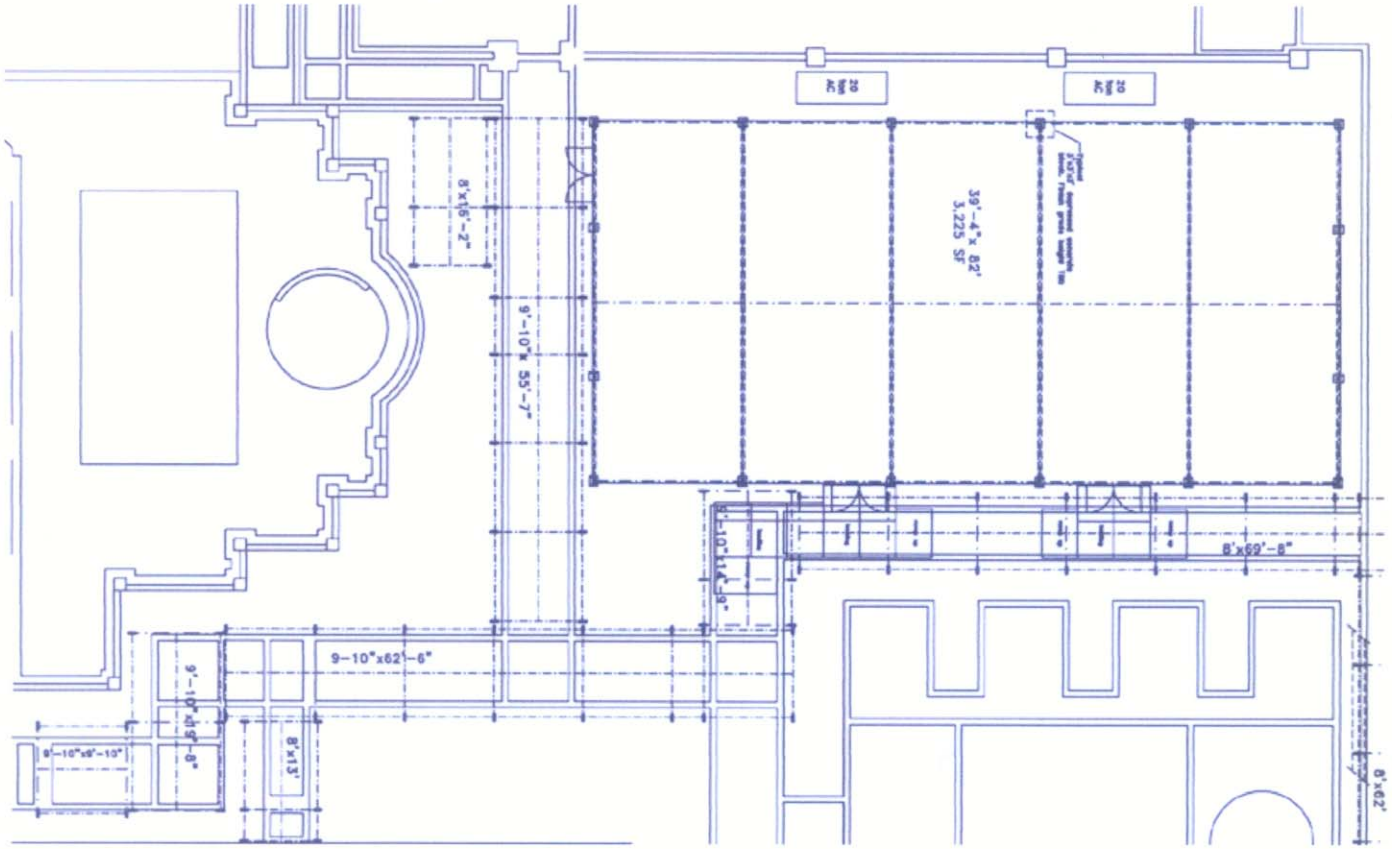
Standard Structures Fitted to a Specific Site

Special Events

Acqualin Hotel, Florida



As an Architectural Consultant to the LosBerger USA, a temporary structures manufacture, A Form Architecture designed a special event scheme using LosBerger's standard muiltflex and uniflex standard equipment for the Acqualins Hotel.

A 3 meter walkway systems leads from multiple access points to two large special event spaces. The Hotel decided to purchase the equipment and set permanent foundations for the structures.

Our primary focus was to use as much standard equipment to fit onto the existing foot print with no site modifications, while keeping structural modifications to a minimum.

Our design drawings were ultimately used for tent configuration approval by the Owner, forwarded to the Owners structural engineer for permanent foundation design and installation. Our design drawings were also used by LosBerger USA to fill the order and produce the required modifications to certain structures.

Project:	Fit Standard Manufactured Equipment to an Existing Site for Multiple Use
Location:	Acqualin Hotel
Client:	LosBerger USA
Details:	Keep modifications to a minimum
Consultants:	LosBerger USA Maryland Office
