As an Architectural Consultant to Special Event Services and Stuart Weissman Productions, A Form Architecture provided architectural site design and NYC building code consulting. AFA also applied for and retained the Structural Component building permit and the Life Safety Permit for the three day Billy Graham 2005 Crusade, attended by over 400,000 persons.

In collaboration with Stuart Weissman Productions, and SMP's coordination with the NYC Police Dept., NYC Parks Dept., The NYC Building Dept. and the Billy Graham team, etc, A Form Architecture designed the main and satellite seating areas, with back stage and surrounding areas. Our cadd database was able to provide Mr. Weissman with critical material quantities and exact layout locations of critical elements within the 50 area site.

AFA supervised the Structural Engineering review of the main stage, light towers and scenic elements with MG McLaren, PC. Special Event Division. MGM provide in house structural reviews while also providing on site inspections, to included remedial suggestions as needed.

Special Event Services used AFA's Architectural Consulting Services to produce another successful Crusade for Dr. Billy Graham.
