As an Architectural Consultant to the New York based Intermedia Production Group, A Form Architecture is providing architectural design services for the proposed 2006 Winter Olympic Metal Ceremony Plaza.

Under the direction of the Intermedia Production Group and in coordination with the design team, AFA's design includes bleacher seating for 4,000 standing for 3,000 persons, position of the stage with attention to sight lines and lighting and camera positions for the broadcast production. A VIP hospitality and seating area is also incorporated.

Most important, the design demands sensitivity to the historic architecture creating the Plaza and the City of Torino's mandate to express the surrounding architecture.

The Intermedia Productions Group design team includes, Staging, Lighting and Television Production.
