

Regent Wall Street Restaurant Expansion

Tensile

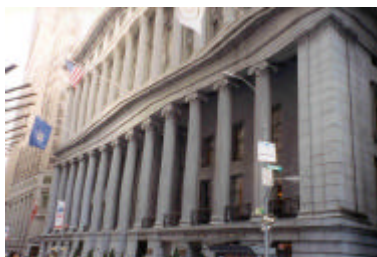

New York, NY.

Elevation

Plan

Regent Wall Street Hotel

Physical Model

M/G Architects and the Regent Wall Street Hotel requested our assistance to design a “temporary” structure for this Landmark building. The design intent was to create an enclosed patio dining area off the Regent’s existing second floor restaurant.

Together with Stamford Tent and Fabric Structures Inc. A.Form architecture designed an exciting space that utilized views from the second floor terrace, provided full enclosure for the spring and the fall months, while providing a temporary structure that could be demounted at a moments notice.

Project: Restaurant Enclosure
Location: Regent Wall Street Hotel
Details: 1500 square feet fabric area
