Plan Drawing

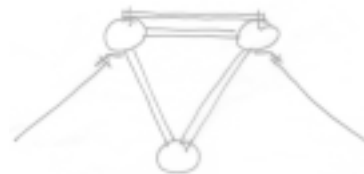

Answering a RFP, A.Form architecture pc was selected out of 6 other architectural firms to design a proposed outdoor amphitheater for the Town of Windsor Connecticut.

The following images and drawings illustrate an "Arch" scheme which was proposed first to the town. Given an unknown height restriction for the site, the scheme was abandoned.

The benefits to this scheme allows for unobstructed views to the stage for the entire audience while giving multiple locations for rigging equipment, speakers, lighting trusses, and spot lights etc.

- Project: Celebrate Windsor-scheme 1
- Location: Windsor, Connecticut
- Owner: Town of Windsor
- Details: Arch Scheme

*"The Arch scheme is a production managers dream by combining unobstructed sight lines with production flexibility"*
