The alternative pole design offers the Windsor amphitheater a requested low profile, while covering the same audience seating area and still providing the production capabilities as the Arch design.

The strategic placement of the poles minimizes the sight line restrictions while keeping the overall profile of the tent as low as possible. An additional benefit was a lower fabrication cost over the initial Arch scheme.

The pole scheme still offers the client a unique venue to the Town of Windsor.

Project: Celebrate Windsor-scheme 2  
Location: Windsor Connecticut  
Owner: Town of Windsor  
Details: Pole Scheme

*“Redesign to meet unexpected constrains should only enhance an architectural program not impede it. The Windsor redesign exceeds our original expectations”*
