

Top: As the premier entertainment venue of the 1996 Olympic games, each day, tens of thousands of people attended performances at the AT&T Global Olympic Pavilion.

Above: A look at the inside of one of the wings reveals a communications center of Olympic proportions.

To celebrate the 100th anniversary of the modern Olympiad, Tribe Inc. contracted FTL/Happold to design an unprecedented hospitality and communications center for Olympians and their families.

As Senior Architect for the Architectural Engineering Team and Project Architect, Andrew Formichella, *President of A.Form architecture pc*, was one of the chief design team members responsible for designing signature architectural elements, overseeing all architectural and engineering design presentations, and supervising the in-house engineering staff.

To insure that the project schedule would be accomplished, Formichella also provided on-site architectural design and crew supervision.

Andrew worked closely with Bruce Rogers of Tribe Inc. and Dave Burke as Job Captain, to produce this exciting building

Project:	AT&T Global Olympic Pavilion
Location:	Atlanta, Georgia
Owner:	AT&T
Details:	40,000 sf. tensile structure
Consultants:	Momentum IMC Buro-Happold Engineers
