Top left: The interior of the centers structural system.

The MOMRA Penthouse in Riyadh, Saudi Arabia is an 8,000 ft² roof top recreation center for Riyadh's Ministry of Public Affairs.

As Senior architect with FTL/Happold, Andrew Formichella oversaw all architectural and engineering design presentations and construction documentation of this exciting building. The scope of work also included full interior design and furniture design.

The tensile structures supporting columns, or "trees" created a clear interior space for squash courts and other sports equipment. The building was also sealed to create an efficient conditioned interior space for the harsh Riyadh climate.

Bottom left: Located on top of the Ministry of Public Affairs Building, the penthouse overlooks Riyadh
